Muhammad Ahmad Zaheer

Software Engineer — .NET Backend Developer

+92-317-440-7879 | ahmad5616zaheer@gmail.com | LinkedIn | GitHub | Portfolio

Summary

Production-focused projects with hands-on experience building **RESTful APIs** and database-driven applications using **ASP.NET Core, C#, Entity Framework Core, and SQL Server**. Experienced in backend development, authentication, API integration, ERP workflows, and full-stack application development. Built production-focused projects involving **JWT authentication, role-based authorization, MediatR, AutoMapper, database management, and third-party API integration**.

Technical Skills

Programming Languages: C#, JavaScript, TypeScript, C++

Backend: ASP.NET Core, ASP.NET Core Web API, MVC, Entity Framework Core, REST APIs

Frontend: React.js, React Native, Angular, HTML5, CSS3, Tailwind CSS, Vite

Databases: SQL Server, MongoDB, Supabase

Authentication & APIs: JWT, OAuth, Role-Based Authorization, API Integration, Input Validation, Rate Limiting

Developer Tools: Git, GitHub, Docker, Visual Studio, VS Code, Postman, Claude, Codex

AI & Integration: OpenAI API Integration, Generative AI Tools, Prompt Engineering

Languages: English (Professional Working Proficiency), Urdu (Native)

Experience

Backend AI Engineer Intern June 2026 – Aug 2026
FlyRank AI *Remote*

- Developed and maintained **RESTful APIs** using **ASP.NET Core and C#**, implementing backend services and application business logic.
- Worked with **SQL Server** to design, query, and manage relational data for backend applications.
- Collaborated with senior developers to build, debug, test, and integrate backend services following development best practices.
- Utilized **Git and GitHub** for version control, code collaboration, and project management.

Junior Software Developer Sep 2023 – May 2026
Al Karam Feeds Mill *Lahore, Pakistan*

- Worked with **BizMate ERP**, supporting and validating workflows across Accounts, Sales, Purchase, Inventory, Procurement, Production, Receivables, Payables, Cash & Bank, Assets, and HR modules.
- Tested and analyzed **ERP module functionality, data flow, and module-to-module integration**, identifying inconsistencies and supporting issue resolution.
- Worked with **SAP Crystal Reports and ERP data** to validate business information, investigate discrepancies, and ensure accurate financial and operational reporting.

Projects

Smart Micro CRM (FYP) | *ASP.Net Core, Web Api, React Native, MongoDB Atlas* Dec 2025 – Present

- Developing a cross-platform CRM mobile application for small businesses to manage customers, leads, appointments, and tasks.
- Building secure **RESTful APIs using ASP.Net Core** and integrating them with a React Native mobile application.

- Utilizing **MongoDB Atlas** for cloud-based data storage, efficient CRUD operations, and scalable database design.
- Implementing authentication, task management, payment tracking, notifications, and analytics to streamline business operations.

Invoice SaaS – Full-Stack Mobile & Web Application | *React Native (Expo), TypeScript, ASP.NET Core, SQL Server*

- Built an invoice management SaaS for **invoices, customers, expenses, estimates, payments, and reports**, including PDF invoice generation and download.
- Integrated **ASP.NET Core REST APIs with SQL Server** for authentication, multi-workspace data isolation, invoice workflows, payment tracking, and business settings.
- Developed a responsive **React Native/Expo mobile and web frontend** with dashboards, analytics, notifications, role-based team management, validation, and multi-currency support.

VoiceCart – Voice-Controlled E-Commerce Platform | *React, TypeScript, ASP.NET Core, EF Core, SQL Server*

- Developed a full-stack e-commerce platform with **React, ASP.NET Core, EF Core, and SQL Server**, including customer storefront, product management, cart, checkout, and order tracking.
- Built a role-protected **admin dashboard** with inventory, orders, products, coupons, reviews, sales analytics, reports, and low-stock monitoring.
- Implemented **English, Roman Urdu, and Urdu voice commands** for selected admin operations with confirmation-based security, JWT authentication, role-based authorization, validation, rate limiting, and structured error handling.

AI Content Detection Web Application | *ASP.NET Core Web API, C#, EF Core, SQL Server, JavaScript*

- Developed a web application to detect AI-generated **text, images, and audio** with confidence scores and classification results.
- Integrated **Sapling API** for text detection and **Hive APIs** for image and audio analysis, with JWT authentication and BCrypt password hashing.
- Used **Entity Framework Core and SQL Server** to store detection results, provider details, user-specific scan history, and timestamps.
- Built a responsive interface with **file uploads, image URL scanning, input validation, and API error handling**.
- Implemented user-specific scan history and backend workflows for managing and retrieving detection results.

Education

University of Central Punjab — Lahore, Pakistan
Bachelor of Science in Software Engineering — *Oct 2022 – Oct 2026*
