SUMMARY

Results-driven Software Engineering undergraduate with practical experience in MERN Stack and ASP.NET Core development. Skilled in designing and developing scalable full-stack web applications, RESTful APIs, database systems, and modern user interfaces. Experienced in React.js, Node.js, MongoDB, C#, and cloud-based development workflows. Familiar with Artificial Intelligence (AI), Generative AI tools, prompt engineering, and AI-assisted software development practices. Strong leadership, problem-solving, and communication abilities with a passion for building innovative technology solutions.

EDUCATION

University of Central Punjab, Lahore	Oct 2022 – Mar 2027
Bachelor of Science in Software Engineering	
Punjab College, Lahore	Oct 2019 – May 2021
F.Sc. Pre-Engineering	

WORK EXPERIENCE

Software Development Intern – remote	Nov 2025 – Dec 2025
- Developed and maintained web application features using React.js and Node.js. - Collaborated with senior developers in debugging and implementing new functionalities. - Managed source code, version control, and deployment workflows using Git and GitHub. - Integrated REST APIs and optimized application performance.	

PROJECTS

Final Year Project

Smart Micro CRM for Small Organization	Dec 2025 – Present
- Designed and developed a CRM platform for customer, lead, and sales management. - Implemented role-based authentication and authorization for secure user access. - Developed RESTful APIs for customer records, lead tracking, task management, and reporting. - Defining pricing, positioning, and customer acquisition strategies to support future product commercialization. - Built interactive dashboards for monitoring customer interactions, sales activities, and business performance.	

Apex Estate – Real Estate Web Application Team Lead / Full-Stack Developer	June 2025 – July 2025
- Led a team in developing a responsive real estate web application using React.js, Tailwind CSS, and Vite. - Implemented user-friendly dashboards and optimized navigation workflows to improve user experience. - Managed source code, version control, and deployment workflows using Git and GitHub.	

LEADERSHIP ACTIVITIES

University Project Team Lead	Mar 2024 – Present
- Led multiple software engineering project teams consisting of 2–3 members. - Delegated technical tasks, monitored sprint progress, and ensured timely delivery of project milestones. - Facilitated communication between team members and resolved project challenges effectively.	

SKILLS AND CERTIFICATIONS

Technical Skills: React.js, Node.js, HTML5, CSS, JavaScript, ASP.NET Core, SQL, MongoDB, C#, C++, GitHub, WEB & RESTful APIs
Interpersonal Skills: Team Leadership, Technical Communication, Analytical Problem Solving, Fluent English
Certifications: MERN Stack Development - Board Infinity (Coursera)
